Revolutionizing the construction and demolition sector

About DISCOVER

The DISCOVER project aims to revolutionize the construction and demolition industry by developing an advanced system for the autonomous, synchronous, and continuous identification and analysis of materials in end-of-life built environments.

Upcoming

We are excited to announce that the DISCOVER project will be featured in the upcoming EBC (European Builders Confederation) workshop "Towards more circularity in construction: a collaborative approach from EU-funded research projects" taking place this December.

17 9th December
09:30 - 13:00 (CET)
EBC premises, Rue Jacques de Lalaing 4, 1040 Brussels (1st floor)

The aim is to bring together three key Horizon Europe projects – BIO4EEB, SUM4Re and DISCOVER – to explore how circular approaches can be better implemented throughout the entire construction lifecycle. DISCOVER will lead the third session, presenting how digital twin technologies enable the reuse of construction components, helping to reduce embodied carbon and promote circularity in the built environment.

You can register [here](#) to attend in person

Events

The DISCOVER project consortium has been actively engaging with industry professionals, researchers, and stakeholders across Europe, sharing insights and promoting sustainable construction and deconstruction practices. Below is a list of notable events where the partners have showcased the project:

TU Delft – The Sixth International Conference on Civil and Building Engineering Informatics (ICBEI 2025)
17 8 - 11 January 2025
Hong Kong

Let's DISCOVER the Future – Now on YouTube!

We're thrilled to announce the launch of our official YouTube channel for the DISCOVER project!

Join us on this exciting journey as we showcase how digital innovation is transforming the construction and demolition sector toward circularity. From pilot site walkthroughs and expert interviews to behind-the-scenes technology demos – we'll be sharing it all!
